Variable adder for July 2022

End of March we informed you about the implementation of the new monthly variable surcharge, due to extraordinary and volatile cost increases for energy, raw materials and transportation. With this measure we adapted our fixed surcharge to the volatile market environment. As announced, the new surcharge will be updated monthly based on the most relevant input costs.

Herewith we announce the surcharge **valid in July 2022:**
1,04 EUR/liter

The surcharge will be either added as a separate line or incorporated into the final price on your invoice (for export regulations).

Please note, this surcharge is only valid in July 2022. The amount of the surcharge valid for deliveries in the upcoming months will be communicated with 30 days prior notice.

We fully understand that you may need additional information with regard to the adder amount. If so, please revert to us and we will supply additional information upon your request.

We kindly ask you to understand why we have to take these measures and hope that the situation reverts to normal soon.

For further questions and information, please contact our local sales person.

LANXESS highly appreciates your trust in our product family and is looking forward to continuing the supply of Lewatit® and Bayoxide® in the future.
Best regards,

Yours sincerely,

LANXESS Central Eastern Europe Branch Office Belgrade
